ORNAMENTAL TREE & SHRUB CARE PROGRAM

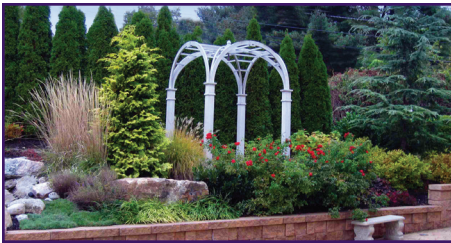

This service is designed to promote health and vitality as well as a preventative and curative plant health care program for your ornamental trees and shrubs.

(This service does not include mature trees 6" in caliper and larger.)

Application #1: DORMANT OIL TREATMENT (LATE WINTER)

Application #2: DORMANT OIL TREATMENT (EARLY SPRING)

This foliar application helps control scale, mites, and over-wintering insect eggs.

Application #3: Plant Fertilizer (SPRING)

Organic Root Drench: Liquid root zone feeding to help promote foliage growth. An assessment of all plant material and lawn condition will be done at this time and appropriate action recommended.

Application #4: INSECT & DISEASE CONTROL (EARLY SPRING)

Application #5: INSECT & DISEASE CONTROL (LATE SPRING)

Application #6: INSECT & DISEASE CONTROL (SUMMER)

Application #7: INSECT & DISEASE CONTROL (LATE SUMMER)

Application #8: INSECT & DISEASE CONTROL (FALL)

To control and target specific insect and disease problems occurring on your plant material as per time of year. This foliar/systemic application targets first hatching insects and diseases on Pines, Spruces, and Evergreens. Pine and Spruce diseased need to be treated for effective control. An assessment of all plant material and lawn condition will be done at this time and appropriate action may be recommended at an additional cost.

Application #9: PLANT FERTILIZATION (FALL)

This soil drench feeding helps plants recover from summer injury and promotes a healthy vigorous plant.

OTHER RECOMMENDED APPLICATIONS

FLEA & TICK APPLICATION: (SPRING THROUGH LATE FALL)

In the early spring, when the temperatures are cool, ticks are present in the lawn areas. As the temperatures get warmer, ticks will retreat to the wood line areas and burrow under the leaf litter.

WINTER PLANT PROTECTION: (LATE FALL/WINTER)

This application helps protect broadleaf evergreen plants from drying winds and winter injury.

DEER PROTECTION: (WINTER THROUGH SPRING)

This application will help reduce deer browsing and protect your landscape.
